# Access.

CURRICULUM & TECHNOLOGY

ALEX SHAW + BAHA MARUPOV
Omaha, Nebraska | Serving the Midwest

# Modernize or create *computing courses.*

Alex Shaw and Baha Marupov are software professionals and college educators. We help faculty update computing courses or create new ones - with practical projects, clear assessments, and materials ready to teach.

### WHY ACCESS EXISTS

While teaching at colleges, Alex and Baha saw a recurring challenge: technology changes quickly, but keeping courses current takes time that faculty must balance with teaching and supporting students. Access exists to help with that work.

College budgets can also make it difficult to match the salaries offered by technology companies.

### TWO WAYS WE CAN HELP

## Modernize an existing course

Review the syllabus and existing materials. Update technologies, examples, and applied projects. Refine assessments, rubrics, and instructor guidance.

## Create a new computing course

Set learning goals, prerequisites, and a course plan. Build lessons, labs, projects, and assessments. Prepare editable teaching materials and guidance for faculty.

### SOFTWARE EXPERIENCE + TEACHING EXPERIENCE

## Alex Shaw

Software professional
College educator

## Baha Marupov

Software professional
College educator

### WORKING WITH YOUR FACULTY

We agree on the course goals, materials, schedule, and fee. We develop the materials with faculty feedback and explain how to use and update them. Your faculty make the academic decisions and approve the finished work.

### CONTACT ALEX ABOUT YOUR COURSE

alexandergshaw@gmail.com

Tell us what you teach, what needs to change, or what new course you want to offer.
